REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest the use of two metal containing structures applied to a substrate. These two structures become two electrodes where in one functions as a cathode and the other will function as an anode with both being formed on a substrate. This appears to be different than typical protections systems used to reduce corrosion. Note for example in Fiorino et al where it states that the foregoing embodiments are performed by connecting the metal to be protected to one terminal of a source of alternating voltage and connecting a second terminal of the source to an electrode which is in contact with the surroundings of the metal. Thus both electrodes do not appear to be on the same substrate. Therefore, it appears that the prior art of record fails to teach and/or suggest applicants instant invention as stated in the instant claims presented.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
